PROFESSIONAL SUMMARY

AI Automation Engineer and Consultant with 4+ years building and deploying intelligent automation systems, LLM-powered agents, and RAG architectures at production scale for enterprise clients across Canada, UK, and Pakistan. Expert in n8n workflow automation, LangChain/LlamaIndex agentic pipelines, OpenAI/Anthropic API integration, model fine-tuning (LoRA/QLoRA), and MLOps. Simultaneously leads AI Security Engineering at Keenu.pk — engineering sub-90-second automated threat response pipelines and AI-assisted SOC triage systems, reducing analyst effort by 60%+. Proven track record delivering end-to-end AI products: chatbots, voice agents, document intelligence tools, phishing detection engines, and security automation workflows. Proficient in Python, PyTorch, FastAPI, AWS, Docker, and cloud-native ML deployment.

WORK EXPERIENCE

Team Lead — AI, Automation & Engineering

Jan 2025 – Present

NJ Marketing Group Inc | Mississauga, Canada (Remote, ~6–7 hrs/day)

- Lead AI and automation engineering practice as front-facing technical authority for enterprise clients across e-commerce, professional services, and digital marketing.
- Architect and deploy production LLM chatbots, RAG pipelines, and agentic AI systems — managing end-to-end lifecycle from design through deployment and monitoring for 10+ simultaneous client projects.
- Engineer complex n8n automation workflows: lead generation pipelines, CRM sync, WhatsApp/email drip campaigns, SEO automation, AI-powered customer support, and security alert routing.
- Lead team of AI engineers and developers — conducting code reviews, setting architecture standards, and delivering cross-functional projects on time for Canada and UK-based enterprise clients.
- Deliver security-aware AI integrations — including SIEM-connected alert pipelines and threat-response automation — bridging AI engineering and cybersecurity for enterprise clients.

AI Security Engineer & SOC Lead

Oct 2024 – Present

Keenu.pk | Karachi, Pakistan (On-site)

- Engineered production AI-powered threat response pipeline: Wazuh detects threat → n8n orchestrates → VirusTotal/AbuseIPDB validates → auto-blocks on pfSense/Sophos Firewall — full cycle under 90 seconds, zero manual intervention.
- Built LLM-assisted SOC triage system — automated IOC enrichment, alert classification, and escalation routing using Python and n8n, saving 2+ analyst-hours per shift and reducing human review time by 60%.
- Designed and deployed SmartPhish — an internal AI-powered phishing detection and simulation platform — running organisation-wide phishing simulation campaigns, scoring employee susceptibility, and auto-assigning targeted security awareness training based on results.
- Automated SCA (Security Configuration Assessment) process using PowerShell and Bash after first year, eliminating all manual assessment effort across Windows Server and Linux hosts.
- Achieved PCI DSS and ISO/IEC 27001:2022 compliance using automation-driven audit workflows, ISMS documentation pipelines, and n8n-powered reporting dashboards.

AI/ML Engineer

Jan 2023 – Jan 2025

NJ Marketing Group Inc | Mississauga, Canada (*Remote, ~6–7 hrs/day*)

- Built production LLM applications (OpenAI, Anthropic APIs) — chatbots, document intelligence tools, and AI assistants deployed for 10+ enterprise clients across UK and Canada.
- Engineered RAG pipelines (Pinecone, Chroma) and agentic workflows (LangChain, LlamaIndex); designed and deployed n8n automation covering SEO, lead generation, CRM sync, and multi-channel customer journeys.
- Fine-tuned domain-specific LLMs using LoRA/QLoRA (PEFT) on custom datasets — improving intent classification accuracy and reducing hallucination rates in production deployments.
- Deployed ML models to production using FastAPI + Docker + AWS (Lambda, EC2, S3) — managed full MLOps lifecycle including experiment tracking (MLflow/W&B;), versioning, and monitoring.
- Developed custom GPT integrations and WhatsApp AI agents — automating end-to-end customer journeys including booking, support resolution, and order tracking for retail and services clients.

Information Security Analyst — Automation Focus

Jan 2023 – Sep 2024

CommTel | Karachi, Pakistan (*On-site*)

- Identified critical manual SOC workflow inefficiencies and engineered first Python/Bash automation scripts — reducing false-positive triage time 25% and alert containment from 4 hours to 90 minutes.
- Authored 8 incident response playbooks (NIST IR) later converted into automated n8n workflows — this work directly evolved into the AI-driven triage systems built at Keenu.pk.
- Led ISO/IEC 27001:2022 compliance programme — ISMS documentation, risk assessments, and policy audit automation across 4 departments.

AI Engineering Intern

Jun 2022 – Dec 2022

NJ Marketing Group Inc | Mississauga, Canada (*Remote*)

- Developed LLM-powered chatbots and automated client workflows using Python and n8n; promoted to AI/ML Engineer within 6 months based on delivery performance.

TECHNICAL SKILLS

AI & LLM Stack	LangChain, LlamaIndex, OpenAI API, Anthropic API, Custom GPTs, Agentic AI, RAG architectures, Prompt Engineering, LLM evaluation, Fine-tuning (LoRA/QLoRA/PEFT)
Model Training	PyTorch, Hugging Face Transformers, PEFT, LoRA, QLoRA, model quantization, instruction fine-tuning, dataset preparation, MLflow, Weights & Biases
MLOps & Deployment	FastAPI, Docker, AWS (Lambda, EC2, S3, SageMaker basics), Kubernetes (familiar), CI/CD basics, model versioning, production monitoring, model serving
Automation & n8n	n8n (expert) — SIEM integration, IP blocking, CRM sync, SEO pipelines, WhatsApp/email automation, webhook orchestration, multi-step agentic workflows
Vector DBs & RAG	Pinecone, Chroma, FAISS, pgvector — document indexing, semantic search, hybrid retrieval, knowledge base design and deployment
Security Automation	Wazuh API, pfSense API, Sophos integration, VirusTotal/AbuseIPDB enrichment, AI-assisted triage, automated playbook execution, phishing simulation (SmartPhish)
Languages & Dev	Python (expert), Bash, PowerShell, JavaScript (n8n nodes), REST APIs, Webhooks, FastAPI, SQL
Cloud & Infra	AWS (Lambda, EC2, S3, SageMaker), Docker, Linux (Ubuntu/RHEL), Windows Server, Git
Data & Integrations	Google Sheets/Drive API, WooCommerce API, WhatsApp Business API, Slack, Telegram, HubSpot, Zapier, Make.com
AI Tools & Platforms	OpenAI, Anthropic Claude, Hugging Face, Gemini API, n8n Cloud, Stability AI, LangSmith
SIEM / SOC Context	Wazuh (expert), IBM QRadar, LogRhythm — production security automation integrations
Frameworks	MITRE ATT&CK, ISO/IEC 27001, PCI DSS, NIST CSF — compliance automation and audit workflow experience

NOTABLE PROJECTS

SmartPhish — AI Phishing Detection, Simulation & Awareness Platform (*Private*)

- End-to-end phishing intelligence platform: ML pipeline detects and classifies phishing attempts → automated simulation campaigns target employees → susceptibility scores auto-assign tailored security awareness training.
- Deployed internally at Keenu.pk; actively running organisation-wide campaigns, measuring click rates, and producing compliance training reports.

Automated IP Blocking Pipeline — Wazuh + pfSense + Sophos (n8n)

- Full-cycle security automation: Wazuh alert → n8n orchestration → VirusTotal/AbuseIPDB enrichment → auto-block on pfSense and Sophos in under 90 seconds. 100% elimination of manual firewall rule creation for IP-based threats.

SOC AI Triage System — Python, Wazuh API, n8n, LLM

- LLM pipeline auto-generating L1 analyst notes, IOC enrichment summaries, and escalation decisions from raw Wazuh alerts — saving 2 analyst-hours per shift. Actively running in production at Keenu.pk.

FirewallAI — Intelligent Firewall Rule Engine (Private)

- AI system that analyses threat context and auto-generates, validates, and applies firewall rules — reducing rule management overhead and human response time significantly.

WooCommerce Bulk AI SEO Updater — n8n + LLM + Google Sheets

- n8n workflow pulling product catalogue, generating AI-written meta titles/descriptions via LLM, and bulk-pushing to WooCommerce — reduced SEO update cycle from days to minutes for e-commerce clients.

Enterprise RAG & Agentic AI Systems — LangChain, Pinecone, OpenAI

- Production RAG knowledge bases for 5+ enterprise clients; agentic workflows via LangChain/LlamaIndex integrated with Slack, WhatsApp, and web apps — reduced client support workload 60%+.

EDUCATION

Bachelor of Software Engineering (BSE)

Jan 2020 – Dec 2023

University of Karachi — UBIT, Dept. of Computer Science | Karachi, Pakistan

Intermediate — Pre-Engineering (FSc)

Aug 2017 – Aug 2019

DJ Sindh Government Science College | Karachi, Pakistan

CERTIFICATIONS & LICENCES

n8n Automation — Level 1 — n8n | *Nov 2025* (ID: 90b688bd)

SOC Summit 2026 — Antisyphon Training | *Mar 2026* (ID: 260dd91d)

AI Governance & Compliance — Securiti | *In Progress*

Claude 101 — Anthropic Skills | *In Progress*

Certified Cybersecurity Educator Professional (CCEP) — Red Team Leaders | *Nov 2025* (ID: b442ad36)

Intro to Critical Infrastructure Protection — OPSWAT Academy | *Oct 2025–2026* (ID: p7TiYHWi3g)

Security Awareness Specialist — Proofpoint | *Jul 2025–2027*

ISO/IEC 27001:2022 Information Security Associate — SkillFront | *Sep 2024* (ID: 01042343391568)

Intro to Deep Learning — Kaggle | *Jul 2025*

Intro to Machine Learning — Kaggle | *Mar 2025*

Google Soft Skills Program — Google | *Aug 2024* (ID: 3207161155385963)

Introduction to Cybersecurity — Cisco Networking Academy | *May 2022* (ID: 541dd995)

Cybersecurity Fundamentals — IBM | *Aug 2022*

Learning the OWASP Top 10 — LinkedIn Learning | *Aug 2022*

CompTIA Security+ (Exam Prep completed) — Pluralsight | *2024*

CURRENTLY PURSUING

CEH — Certified Ethical Hacker — Corvit Systems — in progress

CompTIA Security+ — Exam sitting in progress — Pluralsight prep completed
